

KHUSHBOO CHOPRA

Data Analyst | B.Tech in Artificial Intelligence & Machine Learning

khushboo0087@gmail.com

Portfolio: [Portfolio](#)

GitHub: [GitHub](#)

Delhi, India

PROFESSIONAL SUMMARY

Recent B.Tech graduate in Artificial Intelligence & Machine Learning with practical knowledge of Excel, SQL, Python, NumPy, Pandas, and Power BI for data analysis and visualization. Strong foundation in data cleaning, exploratory analysis, reporting, documentation, and analytical problem-solving. Co-author of a peer-reviewed research publication involving data analysis, model evaluation, and technical reporting. Seeking an entry-level Data Analyst role to apply analytical skills and grow in a business environment.

TECHNICAL SKILLS

Data Analysis & Visualization: Excel (Pivot Tables, formulas, data organization, VLOOKUP, XLOOKUP), Power BI (Power Query, DAX, Data Visualization, Reporting)

Programming & Data Tools: Python, NumPy, Pandas

Databases: Postgre SQL, DBMS fundamentals, CRUD operations

Analytics Concepts: Data Cleaning, Exploratory Data Analysis, Data Interpretation, Analytical Thinking

Professional Skills: Problem Solving, Attention to Detail, Communication, Teamwork, Time Management, Documentation

EXPERIENCE

Examination Operations Assistant (Freelance) | 03/2024 – 03/2026

British Council — ACCA Examinations

- Managed end-to-end registration and documentation for 2,000+ ACCA examination candidates while maintaining 100% data accuracy.
- Verified candidate details and examination records, contributing to a reported 15% improvement in data accuracy.
- Maintained and handled candidate information with confidentiality and attention to data integrity.
- Monitored 100+ examination sessions and ensured accurate execution of procedures, records, and compliance requirements.
- Coordinated with examination staff to resolve candidate queries and operational issues efficiently.

PROJECTS

Customer Shopping Behavior Analysis | Python, SQL & Power BI

- **Problem Statement:** Businesses need to understand who their customers are and what drives purchases, discounts, reviews, and repeat buying to plan engagement and marketing.
- **Impact / Key Insight:** Identified customer segments, purchasing patterns, product preferences, and repeat-purchase behavior, and turned them into business recommendations for customer engagement, marketing, and product strategy.
- **Approach:** Cleaned and transformed the retail dataset with Python (Pandas/NumPy) in Google Colab, ran exploratory data analysis, used SQL to analyze customer loyalty, purchase drivers, and sales patterns, and built an interactive Power BI dashboard.

OLA Ride Booking Analysis | SQL & Power BI

- **Problem Statement:** Ride-hailing operations need clear visibility into successful, canceled, and incomplete bookings, and into what drives cancellations, ratings, and revenue.
- **Impact / Key Insight:** Surfaced trends in ride volume, booking status, cancellation reasons, revenue, and ride distance, and compared customer vs. driver ratings across vehicle types to highlight performance gaps.
- **Approach:** Wrote SQL queries on booking values, ride distances, payment methods, and customer/driver ratings, then

built an interactive Power BI dashboard covering ride volume, booking status, vehicle types, cancellations, revenue, and rating distributions.

Hospital Emergency Room Analysis Dashboard | Microsoft Excel

- **Problem Statement:** Emergency Room teams need a quick way to monitor patient volume, wait times, and satisfaction to spot service bottlenecks.
- **Impact / Key Insight:** Identified busy periods and potential operational improvement areas from patient volume and wait-time trends, along with patterns across admission status, age groups, gender, attendance/timeliness, and department referrals.
- **Approach:** Built an interactive Excel dashboard with KPIs (Number of Patients, Average Wait Time, Patient Satisfaction Score), trend, bar, and donut charts, and month/year filters.

RESEARCH PROJECT / PUBLICATION

Automated EEG Analysis for Harmful Brain Activity Classification
Innovative Computing and Communications (ICICC), Springer Nature – 2025

https://link.springer.com/chapter/10.1007/978-981-96-6681-2_44

- Co-authored a peer-reviewed research publication applying Deep Learning and Convolutional Neural Networks (CNNs) to EEG signal classification.
- Contributed to data analysis, model evaluation, literature review, technical documentation, and research reporting.
- Compared deep learning architectures including EfficientNet, ResNet, and VGG16 for EEG signal classification.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning — 8.3 CGPA | 2022 – 2026

Vivekananda Institute of Professional Studies, GGSIPU

12th Standard (Science) — 74% | 2022

SS Mota Singh School, Janakpuri

10th Standard — 81% | 2020

SS Mota Singh School, Janakpuri

ADDITIONAL INFORMATION

Languages: English, Hindi, Punjabi | German (Beginner – Learning)

Career Focus: Entry-level Data Analyst / Junior Data Analyst roles
